## Where the story of Sheepie® started? In Western Australia!

It all started in 1999, deep in the Australian Outback, where the founders of Sheepie® camped under harsh conditions. The equipment used did not meet their demands and wishes at all! The rough surroundings (warm during the day and cold at night) inspired them to develop an alternative way of camping. The result? Sheepie®, one of the standards in rooftop tents all over the world.

You don't achieve this by sitting still, but by continuous development such as new models, amongst other things, for recreational applications.

Sheepie®. Become part of our passion and explore like never before.

## Enjoy the real outdoors with a Sheepie® rooftop tent

Camping is one thing; going out with a rooftop tent is an entirely different experience! Want to relax and look out over a ravine? No problem! Enough of your car ride? In no time you can relax in your rooftop tent! No problems with bad surfaces or (too much) water under your groundsheet. You can sleep high, dry, and comfortable on your own car.

And the best part is that you can do all that on almost every regular, comfortable car. Sheepie® rooftop tents fit almost any car. Nowadays, the Sheepie® rooftop tent has become the standard both for the seasoned 4x4 enthusiasts and for families with children with a rooftop tent on their passenger cars. In addition to the various models of roof tents, we also have an extensive line of accessories that make (camping) life even more attractive.

“ Looking for more adventure than a normal campsite?”

## Our products

We love camping in nature. The ultimate feeling of freedom. With the Sheepie® outdoor collection, you will do it in style and with maximum comfort. We know which materials are the best to use, as do our experienced customers.

Sheepie® rooftop tents are well tested. Within the Sheepie® collection, there are several models available. The full aluminum tent frame makes Sheepie® rooftop tents the lightest and most durable in the market.

Enjoy the maximum freedom you get with a Sheepie® roof tent. With a roof tent, you can go and camp almost anywhere and whenever you want. Sheepie® has a roof tent for nearly every car, whether you have a passenger car, SUV, or off-road. It is also possible to mount our roof tents on your trailer. Sheepie® roof tents are set up in no time, and the mattress & ladder is standard in the roof tent. Now you can turn your car into a camper.

Sheepie® has several unique models of rooftop tents. Become part of our passion and explore like never before.

**BOOKARA**  
by Sheepie

## The thinnest hard cover ever

In 2020, a new model rooftop tent is added to the Sheepie® collection. The thinnest hardcover ever, only 15 cm thick. If you include the fitting rails, so measured from the roof bars, the height is 18 cm total. The patented roof tent construction is made from a hard aluminum shell. This solid hardcover fits smaller and bigger cars like stations, vans, and SUV's. You only have to install two load bars, or it can be installed directly to your existing roof rack.

## A real eye-catcher

The roof tent fabrics are very durable, high UV and waterproof. The Bookara has an ultra-flat design. The airflow is specifically designed to reduce condensation. All openings have mosquito protection and several storage side bags are installed.

▲ The aluminum telescopic ladder (up to 230 cm) provides easy access. With the Bookara rooftop tent, you can go camping in comfort and style.

## Sheepie® Bookara accessories

Awning Plus

## A great tent for a great price

The Jimba Jimba is the original Sheepie® rooftop tent. Lightweight and attractive design. The Jimba Jimba 2.0 is outfitted with gas springs to automatically open the tent and has a new ceiling with extra ventilation options. Sheepie® is the first with the innovative gas spring system on the European market.

The patented roof tent construction is made from solid lightweight aluminum, and it fits almost every car; you only have to install roof bars, or it can be installed directly to your existing roof rack.

**The Jimba Jimba 2.0 rooftop tent is test winner in Explorer Magazine (Germany) and in KCK-ANWB Magazine (The Netherlands).**

### Travel whenever you like

The roof tent fabrics are very durable, high UV, and waterproof. The inner tent is made of Polycotton, which is a lightweight variation of regular cotton and absorbs less moisture, which ensures the tent to dry quicker. The Jimba Jimba airflow is designed to reduce condensation. The fly is made of a Poly Oxford fabric with a Polyurethane coating; this combination gives the tent the ability to be water-repellent and has great breathability at the same time. All openings have mosquito protection, and several storage side bags are installed.

▲ The aluminum telescopic ladder (230 cm) can be used for easy access, and sleeping on the extra thick mattress is similar to sleeping on your bed at home.

### Sheepie® Jimba Jimba accessories

Also anti-condensation mats available

### Technical specifications

	Medium	Large
<b>Sleeping capacity</b>	2 persons	2 persons
